Any artist will know space can be a daunting thing. The vast empty space of a new canvas sits silent, offering the artists no suggestion of how to begin. Still it beckons to the artists, their fingers itch for the paintbrush, the spray can, the pen, anything to help them transform this blank page and bring their ideas to life.

THINK BIG! is the culmination of work by Tutti artists experiencing the challenge of a blank state and meeting it head on. Each artist successfully transitioned from small scale to large and the sheer size of the works demonstrates their triumph in transforming an empty space into a vibrant, emotive piece of art.
