### **About Frozen Girl**

All members of our ensemble identify with a learning disability. Our stories are vitally important and this work Frozen Girl grew out of workshops where we all explored big moments in our lives to devise short performance pieces. One of these was by Kathryn Evans who spent over two years of her life in a state known as *frozen syndrome* which meant she withdrew into herself. We were all impressed by her work and decided we want to explore this story further. Kathryn was happy about that so we have been working on it with our director Juha Vanhakartano and guest artists Mawar (designer) and Sascha Budimski (sound)

We really hope to see you there.
